

How to Change Your Password

To change your password as a Guild member:

Begin by signing into the website using your current password. Click on ESG Login from the Home menu again. The screen that appears has 3 options: Dashboard, Profile, Logout. Click on Profile to change your password.

Under Account Management, New Password, click inside the box "Generate Password." The highlighted password that appears will be long and complex. You may replace the highlighted password by typing over it with one you can remember more easily. Or, you can save the given, very secure password in your password manager. If you do not have a password manager, you should consider using one.

Scroll down to the lower left-hand side of the screen, click on Update Profile to save your new password word.

The Profile page will be displayed as shown below.
